

## Sustainability Policy

Ecoprocess Engineering Limited is a leader in waste water treatment and energy systems. Ecoprocess Engineering delivers a comprehensive service from project inception and survey through design, manufacturing and installation to operation and monitoring.

Sustainable solutions guided by personal values mean our customers and supply chain provide benefits to stakeholders in the community and environment in which we work and live.

The social, environmental and economic impact of our work is paramount to our core beliefs. This policy underpins our commitment to ensuring that sustainability is considered through all our actions.

The sustainability objectives of Ecoprocess Engineering are listed below:

- Engage positively with regulators and the local communities in which we work, through specific project engagement and through company-wide initiatives
- Actively promote sustainability in our industry through the industry associations, partnerships and organisations we support, including the CWWA.
- Deliver sustainable profitable growth while satisfying our ethical and contractual obligations
- Improve resource consumption, efficiency and production, throughout the whole supply chain from design, manufacture and operation
- Encourage innovative ideas, internally and with our supply chain, thus creating financial savings and benefit for our customers, society and the wider environment

This policy will be reviewed annually, and be adapted and changed where required. This policy will be communicated to all our staff and will be made available to the public via the Ecoprocess Engineering website.
